

Please go to www.quoise.com for product cleaning tips. Go to the **Care + Maintenance** selection.

Tools Required: Flathead screwdriver, Phillips screwdriver, pliers, wire cutters, wire strippers, electrical tape, safety glasses.

Light Source: (2) Medium Base Type-A Bulbs (not supplied), Maximum 100W.

Estimated Assembly Time: 30-45 minutes

Preparation: Identify and inspect all parts before beginning installation. Check package content list and diagrams below to be sure all parts are present. If any parts are missing or damaged, do not attempt to assemble, install, or operate the fixture. Contact your original place of purchase.

⚠ Warnings and Cautions

Turn off electricity at circuit breaker or main fuse box before installation. Consult a licensed electrician if in doubt.

These instructions are provided for your safety. It is very important you read them completely before installing the fixture. We strongly recommend that a licensed, professional electrician perform the installation.

Disconnect fixture from power source before replacing bulbs. Make sure bulbs are given sufficient time to cool before removal.

Package Contents

STEP 2 - Wire Connections

- Wrap bare or green ground wire around green ground screw on the crossbar, no less than 2 inches from the end of the wire. Tighten the green ground screw.
- Use standard wire connectors (C) to make all wire connections. Twist connectors until wires are tightly joined together. Wrap each connection with approved electrical tape and carefully stuff all the connected wires into the Outlet Box.

STEP 3 - Install Shades and Bulbs

- Place Shade (F) over the Cup, line up the mounting hole on the Cup and the hole on the Shade (F), secure by threading the Lock Screw (E) onto the mounting hole. Hand tighten until snug.
- This fixture uses medium base Type-A bulbs (not supplied) with standard screw base. Maximum 100 watts. Insert bulb and screw snugly into place.

Your fixture is now assembled and ready to use. Enjoy!

STEP 1 - Install Inner Backplate and Fixture Body

- Pass the supply wires through Inner Backplate (A). Attach Inner Backplate (A) to Outlet Box with the head of Green Ground Screw facing you. Secure it with Outlet Box Screws (D). Tighten until snug.
- Route all supply wires through the Inner Backplate (A) as shown. Refer to Step 2 for wiring connections.
- Attach Fixture Body (G) over Inner Backplate (A) and secure with Lock Screws (B). Tighten until snug with screwdrivers.
